INSTALLATION GUIDE

CONCEALED KEYHOLE FIXINGS

1

Use the spirit level to mark a level line at the required point of installation.

2

Use the tape measure and measure across all the keyhole centres

3

Transfer measurements across to the line on the wall for each centre point.

4

Now mark on the wall for each keyhole

5

Use the masonry drill with a 7mm masonry or SDS bit, and drill to a depth of 75mm, (you can use masking tape as a depth guage)

6

Insert the 7mm rawl plugs provided and if required use the hammer to ensure the plugs are flush.

7

Use a pozi driver or cordless drill and fix each screw until approx 1/4" pretrudes from the wall

8

Place each corbel/bracket/mantel etc on to the screw heads and adjust the screw until the fixing is solid and not "rocking"

9

Place a spirit level on the brackets and check for level. Small adjustments can be made by tapping the screws with a hammer.

10

Place the shelf/mantel on to the brackets and final check for level. Bracket shelves can be secured using screws or double sided tape.

## KEYHOLE SUPPORT

The 30mm keyhole concealed / hidden fixings are used as support method for shelf brackets, corbel brackets, mantels, surrounds, mirrors and much more.

Each shelf support can hold 10-15 kg in weight.

Secured in place with a rawl plug and wall screw.
